

BIG BROTHER

الأخ الكبير

Current-state assessment and target architecture for the Arabic-first legal self-help platform for Kuwaiti courts: Postgres with row-level security and per-tenant envelope encryption, self-hosted RAG retrieval grounded in the 48-provision Legal Knowledge Base, Counter-Reply v2 with per-sentence traces, and phased delivery under a 162-check compliance suite.

Multi-Tenant SaaS · Kuwait Courts Platform

Next.js 16 · deterministic compliance engine · extends the shipped v2.1 build (38 API routes, 28-rule catalogue, 98-check e2e)
